# 2019/2020

# Graduation Project Ideas

## Dr. Laila Abdel-Hamid

Faculty of Computers and Information

2019/2020

# First Idea

## Name: Yala Now!

## Description

In this idea, we're planning to reduce the gap between people who share the same interest and share same activity with you.

---

## Examples

- Someone needs to play football, so he will easily open the application and according to his location all football teams that are not complete yet will be displayed, so he will join the suitable team.

- Someone needs to go for running, so he will open the application to find the nearby persons or events that are going to run and join it.

- Also that will be for Camping, Traveling, and Gym Life ...etc.

# Second Idea

Name: INVESTO

Description

Money Manager for Daily Outings

---

## Details

A user opens the application, start to choose the category that match his needs, enters his budget and the application will display all the results that match the entered budget.

---

## Example

- Open Application choose Food category.

- Enters 100 LE as budget.

- Application will display any meal with cost of 100 LE that matches the user need.

    Note: Categories will be for food, Co-Working spaces, Parks, Cinemas, Playing Areas ...etc.

# Third Idea

## Name: TravelX

## Description

Help In saving money when shipping from another country, and also making money while traveling to any place.

---

## Details

For many people, it's not easy to get products from different countries with suitable price.

So, by using the application you can order any product you want from any country you want without having to pay the shipping fees. "You can simply see who's traveling to your country and ask him to get it for you"

On the other hand, you can do the same to make some money and help other people.

Also, any person who has excess baggage in traveling bags can agree with anyone traveling with him on the same plane to take some of his baggage.

Note: It's not the final ideas, we will try to find more ideas by your guidance

## Thank You
